Remoter 10 seconds not run will be standby, Press any key wake up

TROUBLESHOOTING METHOD

PROBLEM	REASON ANALYSIS	SOLUTION
The car can't move	The battery voltage is too low	Recharge the battery immediately
	Damage to the battery	Change a new battery
	Line connectors slide	Reconnect the connector
	Damage to the motor	Repair or replace it from the dealers
	Wheel bolt is missing	Equipped with new bolt
	Damage to the fuse	Replace the fuse
	Power can't start	Open the main power switch
The car's speed is low	The battery is not full of electricity	Recharge the battery fully
	Damage to the motor	Replace the motor
	The road is not flat	drive on the flat road
	Load capacity is too heavy	To reduce the load capacity
	Battery is old	Change a new battery
Short mileage	Damage to the battery charger	Change new battery charger
	Damage to the charger socket	Change new charger socket
	Charger without electricity	plug into the power supply
The car shakes when it is driven	Poor contact of the motor	Recharge the battery fully
	Battery is too old	Change a new battery
There was a noise when the car is driven	Damage to the gear box or short of oil	Replace the gear box or add oil
	Damage to the motor	Change the new motor

USING CAUTIONS

The product should be assembled by adults first, then could be used.

The children under 3 years old are forbidden to use this product.

Batteries should be charged by adults. Before use the product, must charge the batteries first.

The first time you use the product, please make sure it has been charged for 10 hours, otherwise it would be damaged and couldn't repair anymore.
