BATTERY POWERED RIDE-ON

Owner's Manual with Assembly Instructions

Styles and colo(u)rs may vary.
Made in China.

The owner's manual contains important safety information as well as assembly, use and maintenance instructions.

The Ride-on Car must be assembled by an adult who has read and understands the instructions in this manual.

Keep the package away from children and dispose of properly before use.

Keep this manual for future reference.

On the purchase of your new Ride-On.

This ride-on will provide your child with many miles of riding of enjoyment. To help assure you and your rider a safe ride we ask you to please read this manual carefully, and keep it for future reference.

Follow the recommendations in this manual, they are designed to improve the safety and operation of your ride-on car and it's rider.

SPECIFICATIONS:

Battery	12V10AH*1	24V7AH *1
Charger	12V1000mA	24V500mA or 24V1000mA

Suitable age: 37-96 months

Load Capacity: Under 50kg

Speed: 3-6km/h

Size of car: with roof 136 * 87 * 110 cm
without roof 136 * 87 * 85 cm

Power way: Charging type

Charge time: 8-12 hours

**WARNING!**

- **CHOKING HAZARD** - Small parts. Not suitable for children under 36 months. The product contains small parts, keep children away when assembling.
- **ADULT ASSEMBLY REQUIRED.**
- Always remove protective material and poly bags and dispose before assembly.
- Protective equipment should be worn. Always wear shoes and sit in the seat when operating the vehicle.
- Only drive on level ground. Never use on the lawn.
- Never leave a child unattended.
- Keep your hands, hair, and clothes away from moving parts.

**SAFETY**

The following safety hazards may result in serious injury or death:

- Never leave child unattended. Direct adult supervision is required. Always keep child in view when child is in vehicle.
- To reduce the risk of injury, adult supervision is required. Never use in roadways, near motor vehicles, on or near steep inclines or steps, swimming pools or other bodies of water, always wear shoes, and never allow more than 2 rider.
- Never use in unsafe conditions such as snow, rain, loose dirt, mud, sand, or gravel, otherwise may result in an unexpected accident such as tipping over, and could damage the electrical system or battery
- Not to be used in traffic.
- This toy should be used with caution since skill is required to avoid falls or collisions causing injury to the user or third parties.
- This toy is unsuitable for children under 36 months due to its maximum speed; Maximum user weight is 50kg.
- This toy has no brake.

**BATTERY INFORMATION**

- Non-rechargeable batteries are not to be recharged.
- Rechargeable batteries are to be removed from the toy before being charged.
- Rechargeable batteries are only to be charged under adult supervision.
- Different types of batteries or new and used batteries are not to be mixed.
- Batteries are to be inserted with the correct polarity.
- Exhausted batteries are to be removed from the toy.
- The supply terminals are not to be short-circuited.

Parts Diagram | 3

HINT: Some parts shown are assembled on both sides of vehicle

PART NO.	PART NAME	Q'ty (pcs)		REMARKS
		without roof	with roof	
1	Vehicle body	1	1	
2	Rear wheel	2	2	2WD 1 PC labeled "R", the other one labeled "L"
3	Front wheel	2	2	
4	Ø12 washer	6	6	
5	Lock nut	4	4	
6	Hubcap	4	4	
7	rear axle	1	1	
8	Steering wheel	1	1	
9	M5x35 machine screw	1	1	Placed on the steering wheel
10	Ø5 nut	1	1	Placed on the steering wheel
11	Seat cushion	1	1	
12	Seat back	1	1	
13	Cargo basket	1	1	
14	M5x16 mahine screw	2	2	
15	Ø4x16 screw	12	14	
16	Front rollbar	1	/	
17	Rear Rollbar linkage	1	/	
18	Rear Rollbar support	2	/	Left and right
19	Roof	/	1	
20	Roof beam	/	2	Left and right
21	Roof front support	/	2	Left and right
22	Roof rear support	/	2	Left and right
23	M5x30 machine screw	/	8	
24	Ø5 nut	/	8	
25	Charger	1	1	
26	Spanner	2	2	
27	Split pin	4	4	
28	Front bumper	1	1	
29	Remote controller	1	1	For R/C type only

Assembly tools required (not included):

Screwdriver

Long nose pliers

1. Insert the tabs on the front bumper into the holes in the front of the vehicle, push until you hear it “click” into place.
 - Turn the vehicle body downside up. Cut off the plastic tie on the front axle with scissors. Remove all the parts from the rear axle.
2. Insert the rear axle through the hole in the gear box and the hole in the back of the vehicle, when inserting it half way, lift the another gear box so that the rear axle can go through it and protrude out. Make sure that the rear axle is centered with left and right ends exposed the same distance outside of the vehicle body.

1. Slide the rear wheel onto the rear axle, ensure the driver on the wheel match up with the gear box.
2. Slide a $\varnothing 12$ washer onto the rear axle.
3. Tighten a lock nut to the end of the front axle with a spanner.
 - Repeat the above procedure to assemble the other rear wheel. **HINT:** An extra spanner has been provided to hold the Lock Nut on the other side of the rear axle while tightening the Lock Nut on the other side. **DO NOT** over tighten.
4. Insert the split pin into the hole on each end of the rear axle. Bend the ends of split pins back using a long nose pliers (not included).
5. “Snap” the hubcaps to the wheels.

Cut off the plastic tie on the front axle with scissors.

7-1. Adjust the front axle plate so that the axle is in the correct position as shown.

7-2. Then insert the M6x16 screw through the hole in the steering linkage, the Ø6 washer and the hole in the front axle plate (ensure the steering linkage sits over the front axle plate as shown), attach the locknut and tighten securely. **DO NOT** over tighten.

Remove all the parts from the front axle.

1. Slide a Ø12 washer onto the front axle.
2. Slide a front wheel onto the front axle.
3. Slide a Ø12 washer onto the front axle.
4. Tighten a lock nut to the end of the front axle with a spanner. **DO NOT** over tighten.
5. Insert a split pin into the hole on the end of the rear axle. Bend the ends of split pin back using a long nose pliers (not included).
5. "Snap" the hubcap to the wheel.

Repeat the above procedure to assemble the other normal wheel.

GAP

After assembling any wheel to the axles, please check the gap between the screw thread and the collapsible (refer to below picture), if the gap is too big, please add two or three washers inside the wheel, but after tightening the nut outside the wheel, please turn the wheel by your finger to check if the wheel can run smoothly, this is very important, because if the wheel can run smoothly, it is ok, but if the nut press the wheel and the wheel can't run smoothly, the motor will be broken easily! Then you need to decrease one or two washers to make sure the wheel can run smoothly!

Attach the Steering Wheel | 9

HINT: If the steering wheel of your vehicle equipped with the sound function, please follow the steps 1-4 to add the batteries (Not Included), and refer to the battery information on page 2.

1. With a screwdriver remove the screw on the battery cover located in the center of the steering wheel.
2. Remove the battery cover from the top of the battery compartment.
3. Insert 2x1.5 AA batteries in their correct polarities.
4. Place the battery cover over the battery compartment and fasten with the screw you removed in step one.

Attach the Steering Wheel

Remove the M5x35 machine screw and Ø5 nut from the steering wheel.

Turn the vehicle body upright.

5. Place the steering wheel over the the steering column, protruding from the middle of the steering wheel base.
6. Align the holes on each side of steering wheel with the holes at the end of the steering column.
7. Fasten a nut on the opposite end of the screw to secure the steering wheel to the steering column.

1. Fit the cargo basket to the bonnet.
2. Insert four Ø4x16 screws and tighten.
3. Plug the battery connector into the vehicle connector.

1. Fit the seat back to the seat.
2. Fit the seat assembly to the vehicle body.
3. Insert two M5x16 machine screws through the seat and into the vehicle, and tighten with a screwdriver.
4. Insert two $\varnothing 4 \times 16$ screws through the seat back and into the vehicle body and tighten.

Seat Bottom View

HINT: The follow steps only for the type without roof.

1. Fit the rear rollbar support to the each end of the rear rollbar linkage.
2. Insert a Ø4x16 screw and tighten on each side.
3. Fit the rear rollbar assembly to the vehicle body.
4. Tighten two Ø4x16 screws on each side with a screwdriver.

HINT: The follow steps only for the type without roof.

1. Insert the front rollbar into the holes in the top side of the vehicle body. Push until you hear it “click” into place.

Type without roof completed.

HINT: The follow steps only for the type with roof.

HINT: The roof, roof beams, roof front supports and roof rear supports are marked "L" and "R", also they are designed to assemble together in only one way. Please follow the guides: L to L, R to R.

1. Fit the both roof beams to the roof.
2. Insert the three Ø4x16 screws and tighten.
- 3-4. Fit the rear rollbar support to the roof beam, using M5x35 machines *2 and Ø5 locknut *2 to secure it. Repeat for the other side. (L2 to L2, R2 to R2)
- 5-6. Fit the front rollbar support to the beam, using M5x35 machines *2 and Ø5 locknut *2 to secure it. Repeat for the other side. (L1 to L1, R1 to R1)

HINT: The follow steps only for the type with roof.

1. Fit the roof assembly to the vehicle body.
2. Insert a Ø4x16 screw through the both roof front supports and into the bonnet, and tighten with a screwdriver.
3. Insert two Ø4x16 screws through the rear rollbar support and into the vehicle body. and tighten with a screwdriver. repeat for the other side.

Type with roof completed.

1. Power button: Turns the vehicle on and off.

2. Low speed forward/reverse shifter: Changes the direction that vehicle moves from forward to reverse.

- To move the vehicle forward, shift the lever to top position.
- To move the vehicle backward, shift the lever to down position.

3. Foot pedal: Applies power (speed) to the vehicle.

- To move the car, press the pedal down.
- To brake or slow down, release pressure from the pedal.

4. Sound buttons: Press for sound playing.

⚠ IMPORTANT

- **Always stop vehicle when changing the speed (if equipped) or direction to avoid damage the gears and motor.**

Use the vehicle on generally level ground ONLY!

DO NOT Use the vehicle on Lawn space!

⚠ IMPORTANT

- The High Speed Protective cover must be removed by an adult.
- Before remove the HIGH SPEED protective cover: Make sure your child knows how to steer, how to start and stop the product and knows the rules for safe driving.

A. Remove the two screws on the top of the high speed protective cover with a screwdriver.

B. Remove the high speed protective cover.

Then you can push the shifter into the “high speed” position.

C. Press down the foot pedal.

HINT: The product is designed to operate in low speed only in reverse.

⚠ WARNING!

- **ONLY an adult is allowed charge and recharge the battery!**
- **This product with Charging Protection: when charging, all functions will be cut off.**

- The POWER SWITCH must be turned in OFF position when charging.
- Before the first use, you should charge the battery for 4-6 hours. Do not recharge the battery for more than 10 hours to avoid overheating the charger.
- When the vehicle begins to run slowly, recharge the battery.
- After each use or once a month minimum recharge time as 8 to 12 hours, less than 20 hours at most.
- Use the only rechargeable battery and charger supplied with your vehicle. NEVER substitute the battery or the charger with another brand. Using another battery or charger may cause a fire or explosion.
- Do not use the battery or charger for any other product.
- If your ride-on with a Digital voltmeter(IF EQUIPPED), the magnitude of voltage will tell you how much power is remaining in the battery when you must recharge the battery. Make sure the vehicle is stop!

12V product	less than 12.5v	The battery needs to be charge.
24V product	less than 24v	

1. Plug the charger port into the input socket (the socket below the seat).
2. Plug the charger plug into a wall outlet. The battery will begin charging.

Battery Disposal

The battery will eventually lose the ability to hold a charge. Depending on the amount of use, and varying conditions, the battery should operate for one to three years.

Important! Recycle the dead battery responsibly. The battery contains lead acid (electrolyte) and must be disposed of properly and legally. It is illegal in most areas to incinerate lead acid batteries or dispose of them in landfills. Take it to a federal or state-approved lead acid battery recycler, such as local automotive battery retailer.

Do not throw the battery away with your regular household waste!

Problem	Possible Cause	Solution
Vehicle does not run	Battery low on power	Recharge battery.
	Thermal fuse has tripped	Reset fuse, see <Fuse>
	Battery connector or wires are loose	Check that the battery connectors are firmly plugged into each other. If wires are loose around the motor contact your distributor please.
	Battery is dead	Replace battery, contact your distributor please.
	Electrical system is damaged	Contact your distributor please.
	Motor is damaged	Contact your distributor please.
Vehicle does not run very long	Battery is under charged	Check that the battery connectors are firmly plugged into each other when recharging
	Battery is old	Replace battery, contact your distributor please.
Vehicle runs sluggishly	Battery low on power	Recharge battery, contact your distributor please.
	Battery is old	Replace battery, contact your distributor please.
	Vehicle is overload	Reduce weight on vehicle.
	Vehicle is being used in harsh conditions	Avoid using vehicle in harsh conditions, see <Safety>.
Vehicle needs a push to go forward	Poor contact of wires or connectors	Check that the battery connectors are firmly plugged into each other. If wires are loose around the motor, contact your distributor please.
	“Dead Spot” on motor	A dead spot means the electric power is not being delivered to the terminal connection and the vehicle needs repair. Contact your distributor please.
Difficult shifting from forward to reverse or vice-versa	Attempting to shift while the vehicle is motion	Completely stop the vehicle and shift, see <Use Your Ride-On>
Loud grinding or clicking noises coming from motor or gear box	Motor or gears are damaged	Contact your distributor please.
Battery will not recharge	Battery connector or adapter connector is loose	Check that the battery connectors are firmly plugged into each other.
	Charger not plugged in	Check that the battery charger is plugged into a working wall outlet.
	Charger is not working	Contact your distributor please.
Charger feels warm when recharging	This is normal and not a cause for concern	

Completely read through this manual and the troubleshooting guide table before calling. If you still need help resolving the problem **Contact your distributor please.**

- It is parents' responsibility to check main parts of the toy before using, Must regularly examine for potential hazard, such as the battery, charge, cable or cord, plug, screws are fastening enclosure of other parts and that in the event of such damage, the toy must not be used until that damage had been properly removed.
- Park the vehicle indoors or cover it with a tarp to protect it from wet weather.
- Recharge the battery after each use. Only an adult can handle the battery. Recharge the battery at least once a month when the vehicle raider is not being used.
- Do not wash the vehicle with a hose. Do not wash the vehicle with soap and water. Do not drive the vehicle in rainy or snowy weather. Water will damage the motor, electric system and battery.
- Clean the vehicle with a soft, dry cloth. To restore shine to plastic parts, use a non-wax furniture polish. Do not use car wax. Do not use abrasive cleaners.
- When not using, all the electrical source should be turn off. Turn off the power switch and disconnect the battery connection.

Fuse

The battery features a thermal fuse with a reset fuse that will automatically trip and cut all power to the vehicle if the motor, electric system or battery is overloaded. The fuse will reset and power will be restored after the unit is turned OFF for 20 seconds and then turned ON again. If the thermal fuse trips repeatedly during normal use, the vehicle may need repair. **Contact your distributor please.**

To avoid losing power, follow these guidelines:

- Do not overload the vehicle.
- Do not tow anything behind the vehicle.
- Do not drive up steep slopes.
- Do not drive into fixed objects, which may cause the wheels to spin, causing the motor to overheat.
- Do not drive in very hot weather, components may overheat.
- Do not allow water or other liquids to come in contact with the battery or other electric components.
- Do not tamper with the electric system. Doing so may create a short, causing the fuse to trip.

**Our products are suitable for
ASTM F963; GB6675; EN71 and EN62115 standard.**
