|     |                     |            |     |             |
|     |                     |            |     |             |

HINT: Some parts shown are assembled on both sides of vehicle

## PREVENT INJURIES AND DEATHS:

- **NEVER LEAVE CHILD UNATTENDED. ADULT DIRECT SUPERVISION IS REQUIRED.** Always keep child in view when child is in vehicle.
- This toy should be used with caution since skill is required to avoid falls or collisions causing injury to the user or third parties.
- Protective equipment should be worn.
- Never use in roadways, near cars, or on near steep inclines or steps, swimming pools or other bodies of water.
- Always wear shoes, always sit on the seat.
- Not to be used in traffic.
- This toy is unsuitable for children under 36 months due to its maximum speed; Maximum user weight is 50 kg.
- This toy has no brake.

## WARNING:

- **CHOKING HAZARD!** Not suitable for children under 36 months.
- **Must be assembled by an adult.**

## Rules for Safe Riding

- Keep Children within Safe Riding Areas:
  - Never use in roadway, near motor vehicles, on lawn space, on or near steep inclines or steps, swimming pools or other bodies of water;
- Use the toy only on flat surfaces. Such as inside your house, garden or playground.
- Never use in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or a well-lit area.
- It is prohibited to change the circuit or add other electric parts
- Inspect wires and connections of the vehicle periodically.
- Do not let any child touch the wheels or be near them when the car is moving .
- This vehicle has adjustable play seat belts. Please instruct children how to tie the safety belt before using, guarantee the security.

Front bottom view

Front axle bottom view, fig E-5

- Gently turn the vehicle body upside down.
- 1. Insert the bend end of the steering column into the hole on the front axle.
- 2. Fit a Ø 10 plastic washer on the steering column.
- 3. Insert a split pin into the hole on the bent end of the steering column, bend the ends of split pin back using a long nose pliers (not included).
- Remove the M5x12 screw, plastic washer, washer and nut from the front wheel axle.
- 4. Adjust the wheel axle so that the axle is in the correct position as shown.
- E-5. Then reinsert the M5x12 screw, plastic washer and washer as shown, make sure the plastic washer sits on the front axle plate, also ensure the Front Axle Plate sits over the Steering Linkage as shown with the stopper, to prevent fingers becoming trapped while steering, attach the locknut and tighten securely.

## Attach the Front Wheels

E

### 2WD

1. Slide a  $\Phi 12$  washer onto the front axle.
2. Slide a wheel onto the front axle.
3. Slide a  $\Phi 12$  washer onto the front axle.
4. Tighten a lock nut to the end of the front axle with a spanner. DO NOT over tighten.
5. Insert the tabs on the wheel cover into the slots on the wheel. Repeat for the other front normal wheel.

### 4WD

1. Slide a gear box onto the front axle ("R" labeled fit to right side, "L" labeled fit to left side.) Make sure the gear box match up with the motor frame on the front axle as shown.
2. Plug the connector on the motor in the connector on the vehicle body.
3. Slide a driving wheel onto the front axle. Make sure the gear on the driving wheel match up with the gear box on the front axle.
4. Slide a  $\Phi 12$  washer onto the front axle.
5. Tighten a lock nut to the end of the front axle with a spanner. DO NOT over tighten.
6. Insert the tabs on the wheel cover into the slots on the wheel. Repeat for the other front driving wheel.

*Rear bottom view*

Cut off the rubber band over the rear gear boxes.

1. Slide a wheel onto the rear axle. Ensure the wheel match up with the gear box.
2. Slide another  $\Phi 12$  washer onto the rear axle.
3. Tighten a lock nut to the end of the rear axle with a spanner.

**Repeat the above procedure to assemble the other rear wheel to the rear axle.**

**HINT: An extra spanner has been provided to hold the Lock Nut on the other side of the rear axle while tightening the Lock Nut on the other side.**

4. Insert the tabs on the wheel cover into the grooves on the wheel.

Repeat for the other rear driving wheel.

## Attach the Handle bar & Front Luggage Carrier

E

**Tools required:**

**Long nose pliers & screwdriver.**

Turn the vehicle body over.

1. Fit the steering wheel to the end of the steering column.
- 2-3. Line up the holes on the steering wheel with the holes on the steering column, insert the M5x40 machine screw. Fasten a nut on the opposite end of the screw. Using a long nose pliers to hold the nut while tightening the screw on the other side with a screwdriver.
4. Fit a luggage carrier to the vehicle body.
5. Tighten three Ø5x12 screws to secure.

Front view

1. Fit the front roll bar to the vehicle body.
2. Insert the four Ø4x16 screws and tighten with a screwdriver.
3. Fit the back rest into the holes on the vehicle.
4. Insert two Ø4x16 screws and tighten.

## Attach the Rear Luggage Carrier & Rear Roll Bar

E

Rear view

1. Turn the luggage carrier upside down. Fit the rear roll bar to the luggage carrier as shown.
2. Insert the two  $\text{Ø}4 \times 16$  screws and tighten with a screwdriver.
3. Fit the rear luggage carrier assembly over the rear of vehicle body.
4. Insert three  $\text{Ø}5 \times 12$  screws through the luggage carrier and into the vehicle body, tighten with a screwdriver.
5. Insert two  $\text{Ø}4 \times 16$  screws through the rear roll bar and into the vehicle body, and tighten with a screwdriver.

Rear view

**E****Connect the Power Supply & Attach the Seat***Seat inside view*

1. Plug the battery connector into the red vehicle connector as shown.
2. Fit the tabs on seat into the grooves on the vehicle.
3. Tighten a Ø4X16 screw to secure the seat to the vehicle body.

## IMPORTANT!

Always stop vehicle when changing the speed or direction to avoid damage the gears and motor.

1. **Key start (if equipped):** Turns halfway to start the vehicle and MP3 player. Turns to the end to start the vehicle and turn on the lights.
2. **Forward-reverse switch:** Changes the direction that vehicle moves from forward to reverse.
  - To move the vehicle forward, shift the lever to top position.
  - To move the vehicle reverse, shift the lever to down position
- HINT: The vehicle is designed to operate in low speed only in reverse.**
3. **High-low speed switch:** Changes the vehicle moves in high speed and low speed in forward.
4. **Foot pedal:**
  - To move the vehicle, press the pedal down.
  - To brake or slow down, release pressure from the pedal.
5. **MP3 player:**

- A. USB slot
- B. TF card slot (Read mp3 format only)
- C. AUX input
- D. Previous / Increase volume
- E. Play / Pause
- F. Next / decrease volume
- G. Change the audio input (If you insert two or more audio input devices). It also controls the bluetooth (if equipped) and FM functions (if equipped).
- H. **Display screen:** It displays the power level of the battery when the vehicle stops. When the numerical value is less than 12, recharge the battery please.

## Attach the batteries of controller

Lift the battery compartment door on the back of the controller and insert two AAA(LR03) batteries.

**HINT: Batteries not included. Refer to the Battery Information on the page 1.**

### 1. Build connection

Long press the forward and reverse buttons for 3 seconds, and the speed indicator flashes. Then power on the vehicle, the speed indicator goes to long bright, means the connection successful. If the speed indicator no response, means the connection failed. Replace the batteries and retry.

### 2. Brake button

Press the button to stop the vehicle, press it again to release the brake.

### 3. Speed select button

The switch operates the vehicle to move in low, normal or high speed.

**HINT: This switch won't work while your vehicle moves reverse.**

## NOTE:

- Leave the remote controller idling for about 10 seconds, it will shut down automatically.
- Rebuild connection when you replace the batteries of the remote controller.

**WARNING!**

**ONLY AN ADULT CAN CHARGE AND RECHARGE THE BATTERY!**

**WARNING!**

This product with **Charging Protection**: when charging, all functions will be cut off! Only an adult can charge and recharge the battery!

- The POWER SWITCH must be turned in **OFF** position when charging.
- Before the first use, you should charge the battery for 4-6 hours. Do not recharge the battery for more than 10 hours to avoid overheating the charger.
- When the vehicle begins to run slowly, recharge the battery.

1. Plug the charger port into the input socket. (above the foot pedal)
2. Plug the charger plug into a wall outlet. The battery will begin charging.

| Problem                                                        | Possible Cause                                  | Solution                                                                                                                                                     |

|                                                                | Battery is old                                  | Replace battery, <b>contact your distributor please.</b>                                                                                                     |
|                                                                | Vehicle is overload                             | Reduce weight on vehicle. Maximum user weight is 50 kg.                                                                                                      |
|                                                                | Vehicle is being used in harsh conditions       | Avoid using vehicle in harsh conditions ,see <Safety>.                                                                                                       |
| Vehicle needs a push to go forward                             | Poor contact of wires or Connectors             | Check that the battery connectors are firmly plugged into each other. If wires are loose around the motor, <b>contact your distributor please.</b>           |
|                                                                | "Dead Spot" on motor                            | A dead spot means the electric power is not being delivered to the terminal connection and the vehicle needs repair. <b>Contact your distributor please.</b> |
| Difficult shifting from forward to reverse or vice-versa       | Attempting to shift while the vehicle is motion | Completely stop the vehicle and shift, see <Use Your New Vehicle>                                                                                            |
| Loud grinding or clicking noises coming from motor or gear box | Motor or gears are damaged                      | <b>Contact your distributor please.</b>                                                                                                                      |
| Battery will not recharge                                      | Battery connector or adapter connector is loose | Check that the battery connectors are firmly plugged into each other.                                                                                        |
|                                                                | Charger not plugged in                          | Check that the battery charger is plugged into a working wall outlet.                                                                                        |
|                                                                | Charger is not working                          | <b>Contact your distributor please.</b>                                                                                                                      |
| Charger feels warm when recharging                             | This is normal and not a cause for concern      |                                                                                                                                                              |

Completely read through this manual and the troubleshooting guide table before calling. If you still need help resolving the problem **Contact your distributor please.**

- It is parents' responsibility to check main parts of the toy before using, must regularly examine for potential hazard, such as the battery, charge, cable or cord, plug, screws are fastening enclosure of other parts and that in the event of such damage, the toy must not be used until that damage had been properly removed.
- Make sure the plastic parts of the vehicle are not cracked or broken.
- Occasionally use a lightweight oil to lubricate moving parts such as wheels.
- Park the vehicle indoors or cover it with a tarp to protect it from wet weather.
- Keep the vehicle away from sources of heat, such as stoves and heaters. Plastic parts may melt.
- Recharge the battery after each use. Only an adult can handle the battery. Recharge the battery at least once a month when the vehicle Raider is not being used.
- Do not wash the vehicle with a hose. Do not wash the vehicle with soap and water. Do not drive the vehicle in rainy or snowy weather. Water will damage the motor, electric system and battery.
- Clean the vehicle with a soft, dry cloth. To restore shine to plastic parts, use a non-wax furniture polish. Do not use car wax. Do not use abrasive cleaners.
- Do not drive the vehicle in loose dirt, sand or fine gravel which could damage the moving parts, motors or the electric system.
- When not using, all the electrical source should be turn off. Turn off the power switch and disconnect the battery connection.

The battery features a thermal fuse with a reset fuse that will automatically trip and cut all power to the vehicle if the motor, electric system or battery is overloaded. The fuse will reset and power will be restored after the unit is turned OFF for 20 seconds and then turned ON again. If the thermal fuse trips repeatedly during normal use, the vehicle may need repair. **Contact your distributor please.**

To avoid losing power, follow these guidelines:

- Do not overload the vehicle.
- Do not tow anything behind the vehicle.
- Do not drive up steep slopes.
- Do not drive into fixed objects, which may cause the wheels to spin, causing the motor to overheat.
- Do not drive in very hot weather, components may overheat.
- Do not allow water or other liquids to come in contact with the battery or other electric components.
- Do not tamper with the electric system. Doing so may create a short, causing the fuse to trip.

## Disposal Of Battery

- Your sealed lead-acid battery must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of your lead-acid battery in a fire. The battery may explode or leak.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, land filling or mixing of sealed lead-acid batteries with household trash is prohibited by law.

Our products are suitable for ASTM F963; GB6675; EN71 and EN62115 standard.
